示例

请求url: GET http://localhost:8080/api/v1/fans/?page=0&pageSize=10

响应: PageData<User>

3 获取关注列表GET /api/v1/fans/regard

示例

请求url: GET http://localhost:8080/api/v1/fans/regard

响应: Collection<User>

4 取消关注 /api/v1/fans/cancel/{userId}

示例

请求url: GET http://localhost:8080/api/v1/fans/cancel/8

响应: BaseResponse

5: 涉及对象

```
public class Fans{
    public static final int STATE_NORMAL = 1;
    public static final int STATE_CANCEL = 2;

    public static final int TYPE_NORMAL = 1;

    private long id;
    private int userId; //被关注的人的id
    private int fansId; //粉丝的id
    private long time;
    private int state;
    private int type; //值为上面常量
}
```
